AWesome
Felt singled out my Nianyi, and did not appreciate him questioning my group placement after our group was selected.
Given the constraints of an online course, I felt that Nianyi made all efforts that were possible to engage with the students in the course. I appreciated the thoughtful weekly comments and questions on the discussion board.
Nianyi was extremely respectful and helpful. He helped us along with our final project and provided advise on scope and calculations and receptive to our ideas

Please explain your instructor effectiveness rating.

Comments
This is my second course with Nianyi as GSI. He is one of the best GSIs ever. He is very helpful and always does his best to clarify concepts in the easiest way possible. He is patient with our questions, very understanding and is always a great sport. I wish him the best for his future.
Didn't have a great deal of interaction with him so I'd really prefer to vote "n/a".
Very responsive!
Recommend that the GSI provide guidance to the class regarding weekly discussions, in particular length of comments.
Alexa and Nianyi did their best in explaining strategies to solve the problem sets. Both respond to inquiries in a timely manner, and effective in giving guidance to students.
Nianyi provided excellent, clarifying feedback on the group project assignment each week and offered much appreciated support during office hours.
Nianyi has been wonderfully patient and thorough during office hours. This is now the 2nd class I've had where Nianyi was my GSI and I really appreciate the effort he puts towards making sure students truly understand the lecture material and course assignments.
Nianyi reached out to our group to set up a call to discuss our final project. Overall, he was helpful and clear about what he was looking for in the assignment. I appreciated that he spoke with our group.

Please explain your course effectiveness rating.

Would have preferred greater detail on the practical aspects of population health with more practice in the same.
a tad fast
