Comments
I was very comfortable with the climate that I encountered in this course.
The discussion topics were great brain teasers and exciting to respond to. A culture grew here in my opinion. They typically were abstract enough to leave space for the student to check their understanding of the lectures, use critical thinking, design solutions, and share new ideas and opinions with our peers and colleagues. Everyone chiming in together made an interesting, and intense, climate within the course.
Par for the course for UC Berkeley. Very respectful, considerate, and accommodating

**Please explain your course effectiveness rating.**

Comments
The material was covered in a very effective way, but I wish the group project was more clearly explained and defined, with things like rubrics and more direction.
The course was very effective and I greatly benefited from taking it but there is still room for improvement.
This was my first Economics class. It was designed brilliantly and will forever influence how I view Population Health in the U.S.A.
The aim and instructions for the project were very hard to understand.
One of my favorite courses of the program. Will hopefully get to take some more health economics courses asap
